

# «WOMEN'S MESSAGE»

## Preamble

On 1 January 2000, in Antarctica (where there are no state borders), the «Symbol of The Third Millennium» - the «Flame of Preservation of Civilization», was formed as part of the «Towards the Twenty First Century» programme. «Flame The III Millennium» was lit from the 31 virtual stars, which were cultural symbols in different countries at different times. Also, within the framework of this program, representatives of 18 countries signed a Memorandum on the Preservation of Human Civilization at the meeting of the III Millennium.

After this "Symbol of The Third Millennium" was carried (as the Olympic Flame) through many countries along the route: Antarctica – new York – Paris – Berlin – Moscow – Sydney, where he joined with the Olympic Flame, after the end of the XI Paralympic games in Sydney.

## The Idea of "Women's Message»

1. Considering that the women of planet Earth are the fundamental basis of Human Civilization, the situation where there is no Women's Message is paradoxical. This paradox must be corrected.

It is planned to form a comprehensive Women's Message, which should include:

- the transfer of information in Space,
  - finding the algorithm of communication with representatives of flora and fauna (for example, dolphins),
  - consolidation of scientists for interdisciplinary interaction to find algorithms for interaction with "collective unconscious" and "collective conscious" (for example, research "Schumann Waves").
2. "Women's Message" does not imply a declarative approach to this program. It should take over the consolidation of socially active women and the compilation of the most serious problems of Civilization, such as the problem of the C-13 isotope, which is a threat to the existence of men.

## Space part

Human Civilization is only carried out 6 Messages into Space.

First - The first-the «Message of "Peace", "Lenin", "USSR"» (1962)

Second - «Arecibo Message» (1974)

Third - «Cosmic Call» (1999)

Fourth - «Teen Age Message» (2001)

Fifth - «Cosmic Call» (2003)

Sixth - «A Message From Earth» (2008)

Seventh – «Women's Message» is planned to be implemented in 2020, using the capabilities of the leading space countries.

**Remark:** 2020 has been chosen, as from this date the signals of the «Children's Message» (2001) to the border of our Galaxy (Milky Way) will go for another 50 years. This should happen in February 2070 (the Constellation of the Dolphin). Also in 2020 there will be 100 years, as the musical instrument of "space music" Theremin was invented. Through this instrument musical works included in the previous Messages were performed.

### **Also planning:**

1. To hold scientific seminars for the formation of new philosophical concepts in search for «FRIENDS IN MIND»:
  - a) in UNESCO and the European Space Agency (Paris, France)
  - b) in the «SETI Institute» (Mountain View, USA)
  - c) in Star City (Moscow region, Russia)
  - d) in China National Space Administration (Beijing, China)
  - e) in Japanese Aerospace Exploration Agency (Chofu, Japan)
2. Holding the international music festival «Space Music» (to the 100th anniversary of the Theremin)
3. Lay on the territory of the UN «Time Capsule» with the wishes of the women of the planet Earth, which should be opened at the beginning of the 22 century.

The Organizing Committee and the working group are prepared proposals to the UN Secretary General to include the issue of «Women's Message» in the agenda of the 73rd UN General Assembly. The preliminary report was announced in March 2018 within the framework of the 72 UN General Assembly.

It is assumed that using the capabilities of the UN (in particular, UN WOMEN, UNESCO) to connect the majority of the world's female population of the planet Earth, making the action a global one.

Preliminary format «Women's Message» is planned by analogy with the program «SETI for all» (SETI – an international program since 1959 to find extraterrestrial intelligence).

## Early Message ideas

The idea is to report our extraterrestrial brothers in mind appeared a few centuries ago. German mathematician Karl Friedrich Gauss in the first half of the XIX century offered to cut down in Taiga triangle with sides of 15 km and sow it with wheat. The aliens had to notice it and thus guess that there is a reasonable life on Earth. Gauss plan was not implemented, as the area of the triangle he proposed could be correlated with the size of a small state, for example, Ireland, and the project did not want to invest.

Gaussian was echoed by Austrian astronomer Joseph von Littrow, who believed that life was on the Moon. To attract the attention of the lunarians he intended with the help of gigantic trenches in the Sahara desert. He intended to fill it with kerosene and set it on fire at night. To fill one kilometer of the trench required 5 million cubic meters of gasoline. This, as in the first case, made the project not implemented.

In 1869, the French poet Charles Crowe proposed the use of a giant mirror to collect sunlight and direct towards Mars. Crow spent most of his life trying to get officials to implement his idea.

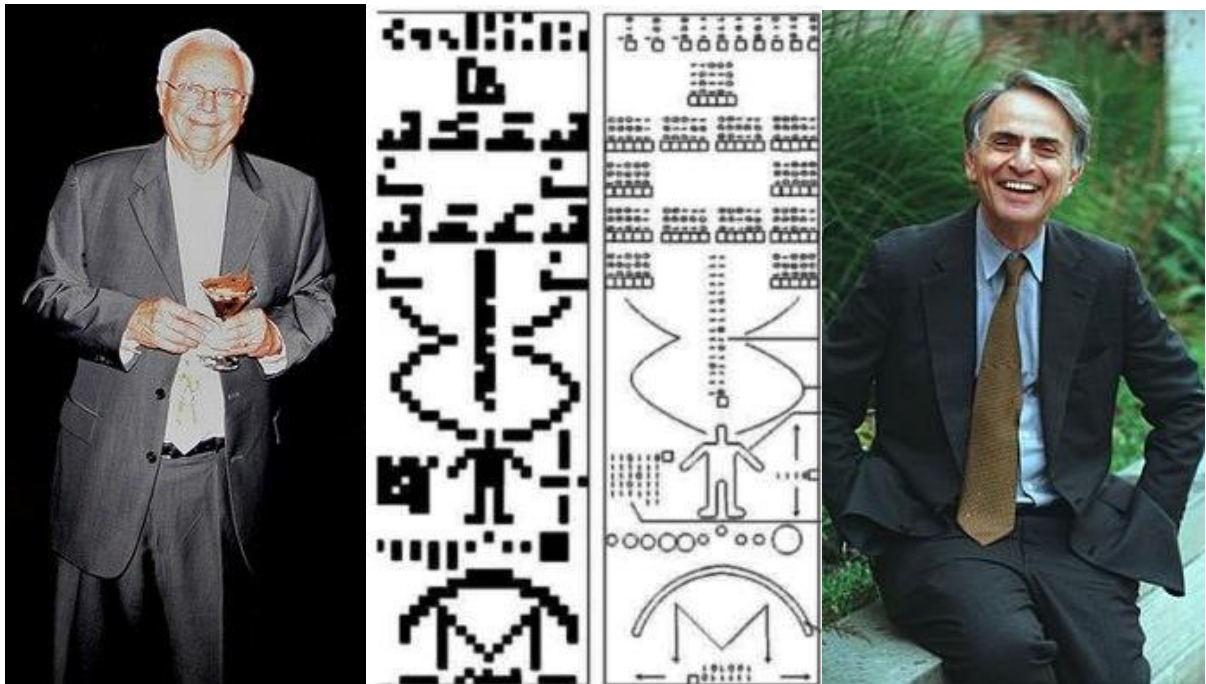

Karl Friedrich Gauss

## The First Message

The first message was sent on November 19, 1962 from the center for long-range space communications in Yevpatoria. It consisted of three words «Peace», «Lenin», «USSR». Formally, it was a test of the equipment, but it seemed boring to send just signals to scientists, so the researcher Academy of Sciences offered to send a romantic «World. Lenin. USSR» in Morse Code.

The signal was successfully reflected off of Venus and back to Earth, but some of the information went into space and went to the constellation Libra (which contains three planets, similar in structure to the to the planet Earth).

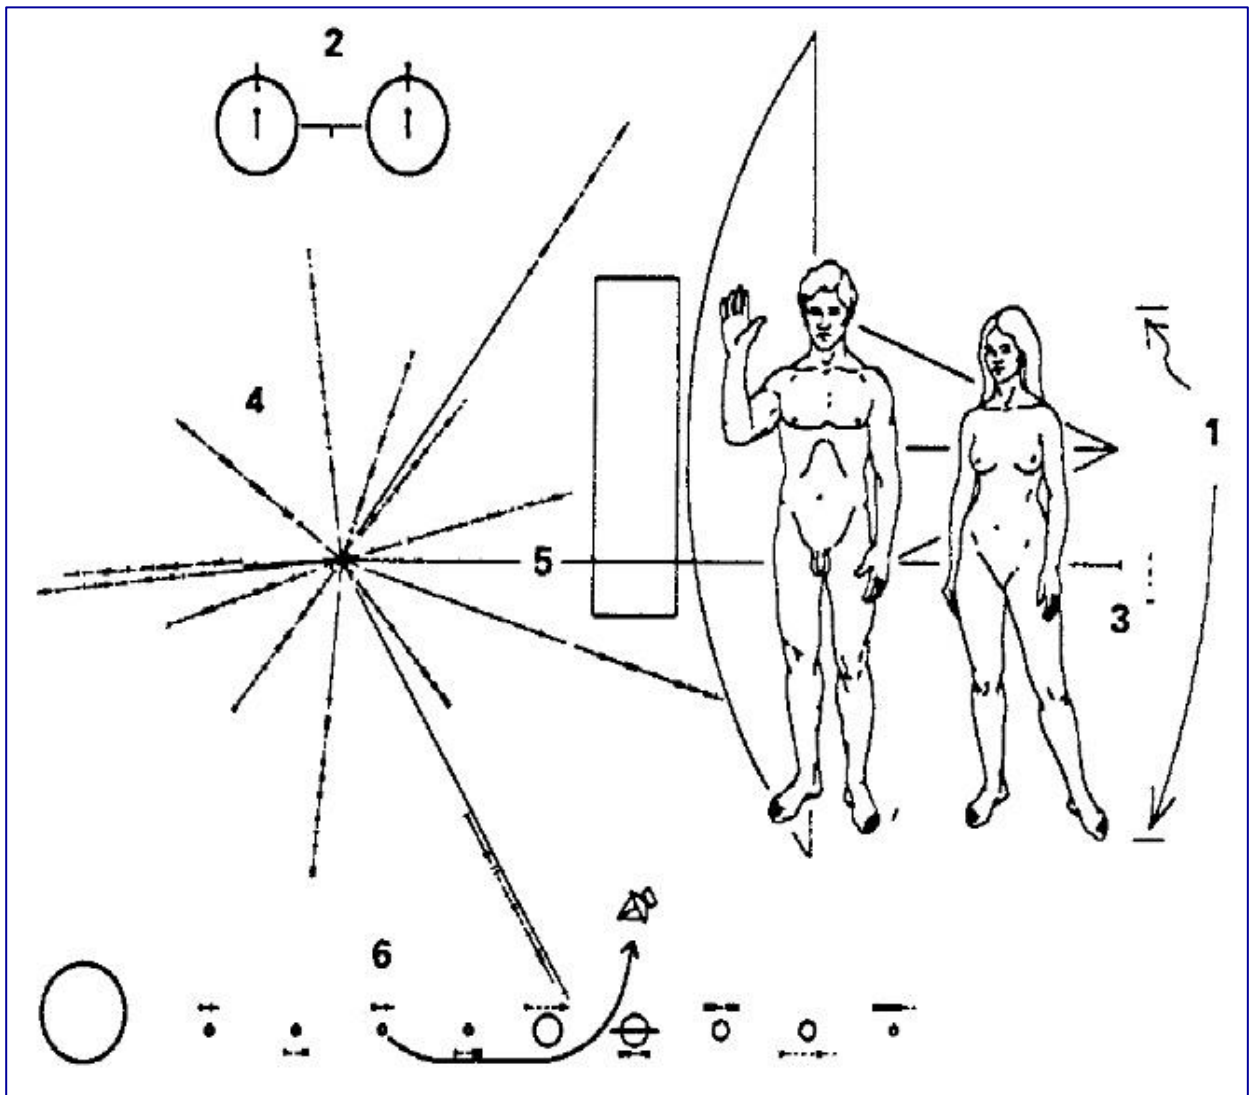

## Arecibo Message

The next message was sent in 1974 from the Arecibo radio telescope in Puerto Rico in the constellation of Hercules cluster. The authors of the message of Francis Drake (by the way, the author of the famous equations, allowing to calculate the number of planets in the Universe) and Carl Sagan (astronomer, ectobiology ) encrypted data on the biochemistry and structure of DNA, the population of the Earth, the Solar system and the Arecibo telescope.

The message will reach potential recipients in 25,000 years. And the same amount of time it takes to respond, if it does....

## Message on the "Pioneer"

Carl Sagan was the author of another message. In 1972 and 1973 on board the "Pioneer - 10" and "Pioneer - 11" were sent plates of anodized aluminum with a schematic image of a man and a woman. After that, Sagan was criticized for sending out in space "indecenty".

Find out what the aliens think about it, we can at least two million years later, when the "Pioneer" reaches its destination - the brightest star Taurus - Aldebaran.

## Message on «Voyager»

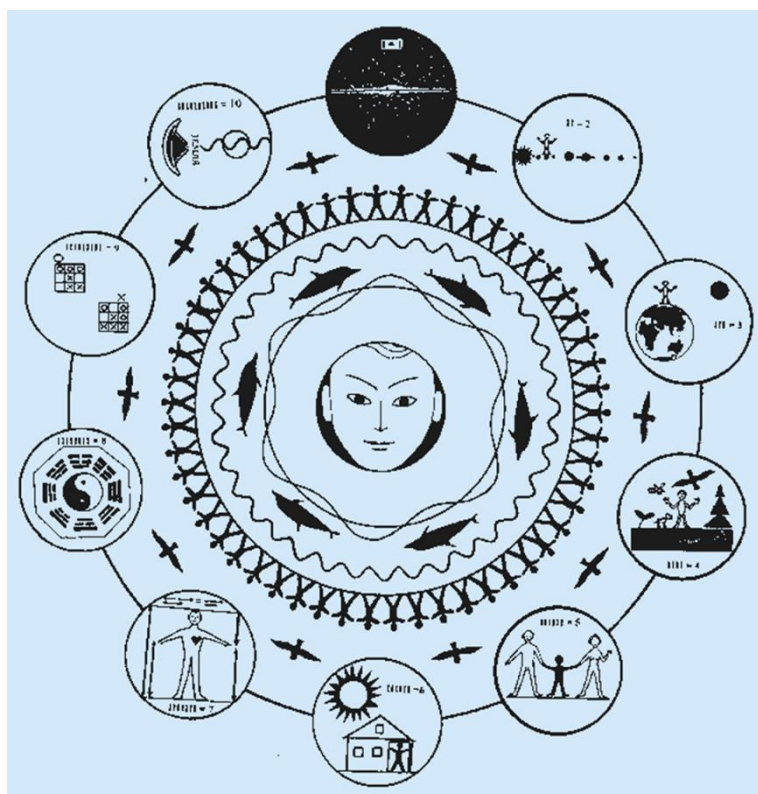

To somehow smooth out the embarrassment of indecent images, in 1977 another message was sent to space - two gilt plate, a phonograph, a needle for their reproduction and instructions. If the case were to happen now, we would have to add another user agreement, at the end of which the alien mind would have to put a tick. On the plates were recorded by eastern and western classical music (Bach, Beethoven, Mozart, Stravinsky), dance music (Chuck Berry and Louis Armstrong). There is also Georgian choral singing, ancient Chinese music and singing of the peoples of New Guinea on the record. Also alien will hear the sounds of human speech, birds singing, ocean noise, etc.

## Message from Joe Davis

After the message of Carl Sagan's «Pioneer» the american scholar John Davis, who worked at the University of Massachusetts, expressed the view that Space Messages to priority women should be especially noted. The aim was to send into space the signals corresponding metaphorical female breathing and breath of the Earth. To implement the plan, Davis gathered a group of like-minded people and invited several ballerinas from the Boston National Ballet. Astronomers and astrophysicists, who took part in the project, were chosen four nearest to Earth stars, where it was planned to send a message. However, the group managed to make only a trial run signals (total in several minutes), after which the program was closed United States Air Force. Extraterrestrials Civilization did not know about «Women's Breath of the Earth».

## Послания «Cosmic Call», «Teen Age Message»

The most frivolous message was sent by the physicist professor Alexander Zaitsev in 1999 from a telescope in Yevpatoria. In addition to information about humanity, it contained advertisements from sponsors (the project was invested by individuals).

In 2001 same Professor Zaitsev arranged to send into space «Children's Message» under the same lead in space was sent to «Children's Message», consisting of songs selected by young people from 15 cities of Russia. Also to the Polar Star was sent the song the Beatles «Across the Universe» and advertising chips Doritos...

Remark: About women and SETI

On 17 December 1998, the General Assembly of the United Nations adopted resolution 53/202, by which it decided to designate the 55th session of the General Assembly, that opened on 5 September 2000, as “The Millennium Assembly of the United Nations” and to convene a “Millennium Summit of the United Nations”. Supporting the Secretary-General's proposal for the Millennium Assembly and the Millennium Summit, the General Assembly expressed the conviction that the transition period at the turn of the century provides a unique and symbolically important moment for Member States of the United Nations in terms of formulating and prioritizing the leadership of the United Nations in the new era.

**"The occasion of the third millennium presents a timely opportunity for the only global organization, in terms of its membership as much as of its areas of work, to identify the challenges that it will face in the future and to engage in an imaginative exercise to enhance and strengthen this unique institution,"**

**UN Secretary-General  
Kofi Annan  
(1996-2006)**

**The International Union "Perspective World"  
is an international non-governmental organization  
with the basic aim of promoting integration  
processes in a multipolar world.**

**In the framework of the international program of the United Nations  
"Towards The New Millennium"  
in Antarctica (zero political point) in 2000  
the FLAME OF THE III MILLENNIUM  
– was lit  
Flame of Peace, Flame of Hope, Flame of Future.  
Flame against man-made disasters, terrorism, wars, violence.**

For the first time in the history of the Antarctic, a heavy transport aircraft Il-76 landed on an ice airfield, for the first time the travellers reached the South pole on wheel all-terrain vehicles in record time – five days, for the first time balloonists took off and flew in balloons over the South pole, for the first time in the history of Antarctic expeditions mass parachute landing was done onto the Patriot Hills.

At the turn of the Millennium, the Flame of the Millennium was virtually lit from 31 stars that have played a sacred role in the development of human civilization or formed cultural ideological basics throughout the evolutionary history of Mankind (Betelgeuse, Polar Star, Sirius, Deneb, Spica, Regulus, Vega, Arcturus and others).

88 people from 18 countries took part In one of the largest international non-governmental expeditions called "Towards XXI century" in Antarctica, an area without any national borders.

Among participants were renowned travelers, astronauts, politicians, scientists.

54 present and former world champions in various sports.

The Flame of the Millenium lit at the South pole was handed over to the representatives of the International Ultramarathon in which over 1,500 people from 42 states participated.

## Application No. 4

**About the author of the  
«Symbol Of the III Millennium» - «Flame Of Preservation Of  
Civilization» and «Women's Message».**

Olga Afanaseva is a professional psychologist.

She was born in November 7, 1975 in a small town Klinty in Western Russia. She now lives there, working, raising 2 small children.

She co-authored the «Symbol Of The III Millennium» and the «Fire Of Preservation Of Civilization». The idea came to her in 1998. Also she ran with the torch of «Flame Of Civilization» across countries and continents in 2000. of the «Flame Of Preservation Of Civilization» across countries and continents in 2000. Despite the poor health, she ran with a torch of Flame on a par with professional athletes.

At the beginning of 2017, remembering the upcoming 10th anniversary of the last Space Message - «Message from Earth», Olga proposed to the world community a comprehensive project of «Women's Message».

On November 4, 2017, as part of a visit to the Director – General of UNESCO Mrs. Irina Bokova, the delegation of the «International Scientific Club "Sofia Club"» (Bulgaria) presented its projects, including the «Women's Message», the scientific basis of which Olga proposed to develop together with the «Sofia Club» (Sofia is the goddess of Wisdom in ancient philosophy).

Olga also proposed the initial composition of the organizing Committee of the Women's Message, which is expected to invite world-famous women from different countries who are related to Space, issues of global attitude to the world.

Olga is now the official representative to the 72nd General Assembly of the United Nations.

**Social organization «Sail of Hope»**

Consultative status with the United Nations  
Economic and Social Council (ECOSOC)  
Member of the United Nations Global Compact (UNGC)  
Member of the World Alliance for citizen complicity (CIVICUS)  
Member of the working group C20/Civil BRICS

136. Zhang Haidi – president of Rehabilitation International (China)

**Application No. 6****Legal news:**

For example, in 1969, the US Congress passed the "Alien Contact Act" (CFR, Chapter 14, part 1211), which gives NASA the right to stop attempts to establish contacts between US citizens and aliens. In addition, in the United States until 1991 there was a ban on unauthorized attempts to contact other civilizations.

In order not to violate the current legislation and to be in the legal field «Women's Message» can be implemented not by citizens of countries, but by an international organization, for example, UNESCO (France), SETI Institute (USA), Sofia Club (Bulgaria), World Club (Scotland). In addition, citizens (namely women, because we are talking about the «Women's Message») send information from yourself, have a choice:

- a) to support the collective Memorandum signed in 2000 within the framework of the programmes approved by the UN on the meeting of the III Millennium;
- b) to form your own message and send it not by yourself, but through the international organization chosen by the organizing Committee of the «Women's Message»;

**NOTE: Choosing a) or b) [or a) and b) together], the woman has no feedback, thus the legal justification of "CONTACT" is not confirmed and the LAW is NOT TRANSGRESS.**

In addition, the «Woman's Message» implies a wider range of contacts, namely:

- a) contacts with the Earth's flora and fauna (for example, dolphins);
- b) with REALITY, that philosophers call "collective unconscious" and "collective conscious".

**Application No. 7****Remark: About women and SETI.**

The report is written on sheets of A-4 format.

1. Format A-4 is 1/16 part of the format A0, which is the area of 1 m<sup>2</sup>. Therefore, leaf A-4 is 1/16 of a square meter. Its dimensions are 297 x 210.
2. The sides of sheet A-4 belong to each other as 1 to the square root of 2.
3. The width of sheet A-4 coincides with one of the most important figures in modern astronomy-the neutral hydrogen line.

Hydrogen atoms contain one proton and one electron, each of which has its own "spin" - the magnetic moment. Their "spins" can navigate in one and same direction, and can and in opposite.

The transition between these positions, is accompanied by the absorption or emission of energy in the form of a quantum of radiation in the radio band, approximately at a wavelength of 21 cm.

4. In fact, 21-centimeter microwaves are the most common in Space. Therefore, "aluminum plates", who went in flight on Pioneer 10 and Pioneer 11, the radio line of neutral hydrogen was adopted as a benchmark.

Among the symbols of humans and Human Civilization, the transition between the two main states of the hydrogen atom is located on the "aluminum plate" at the top, and the growth of the woman depicted on this plate is equal to eight such units, 168 cm, as 8 sheets of A - 4.

This remark is about the responsibility of people who write something on blank sheets, be it poets, scientists, politicians, students or bankers. It is a remark about the responsibility of women to Preserve Human Civilization.
